

**Amendments to the Claims:**

The following listing of claims replaces all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently amended) A foldable water tank, comprising:
  - a) a foldable receptacle having a bottom wall and vertical sidewalls, said sidewalls being inclined inwardly; and
  - b) a plurality of support structures connected to said sidewalls to support said sidewalls in the inclined position when said receptacle is empty.
2. (Original) A foldable water tank as in claim 1, wherein said support structures are disposed within said receptacle.
3. (Original) A foldable water tank as in claim 1, wherein said support structures are disposed outside said receptacle.
4. (Withdrawn) A foldable water tank as in claim 1, wherein:
  - a) said receptacle is substantially a truncated pyramid having a plurality of upper corners; and
  - b) each of said support structures is connected to a respective said upper corner.
5. (Original) A foldable receptacle as in claim 1, wherein:
  - a) said each of said support structures includes a vertical member inclined inwardly toward the interior of said receptacle; and

b) a clip disposed at an upper end of said vertical member to hook into an opening in said sidewall.

6. (Original) A foldable receptacle as in claim 1, wherein said support structures include tubular members.

7. (Original) A foldable receptacle as in claim 1, wherein each of said support structures comprises:

a) first, second and third tubular members pivotally joined at their first ends;

b) said tubular members having a storage position wherein said tubular members are adjacent each other; and

c) said tubular members having a deployed position wherein said tubular members are spread apart from each other to form acute angles between each other at said first ends.

8. (Currently Amended) A foldable water tank as in claim 7, wherein:

a) said first member is inclined vertically when deployed;

b) first brace connected to said first and second tubular member members; and

c) second brace connected to said first and third tubular member members.

9. (Original) A foldable water tank as in claim 8, wherein:

a) said first and second braces are pivotally connected to said second and third tubular members, respectively; and

b) said first and second braces are removably secured to said first tubular member.

10. (Currently Amended) A foldable water tank as in claim 1, wherein said receptacle ~~is open at the~~ has an open top.

11. (Original) A foldable water tank as in claim 1, wherein said receptacle includes an outlet or inlet flange.

12. (Currently amended) A foldable water tank as in claim 7, and further comprising:

a) a bag configured to be carried by a person; and

b) said receptacle when folded and said support structures in said ~~stored~~ storage position are configured to fit inside said bag.

13. (Currently Amended) A foldable water tank as in claim 5, wherein:

a) said receptacle includes a plurality of sleeves; and

[[a)]] b) said vertical member of each support ~~structures~~ structure is received within a respective sleeve.

14. (Currently Amended) A foldable water tank, comprising:

a) a foldable receptacle having a bottom wall and vertical sidewalls, said sidewalls being inclined inwardly; and

b) a plurality of support structures removably connected to said sidewalls to support said sidewalls in the inclined position when said receptacle is empty; and

c) each of said support structures including a vertical member secured to a base, said vertical member being inclined in the direction of said sidewalls.

15. (Original) A foldable water tank as in claim 14, wherein said support structures are tubular.

16. (Original) A foldable water tank as in claim 14, and further comprising means for folding said support structures into a compact configuration.

17. (Original) A foldable water tank as in claim 14, wherein said support structures are disposed within said receptacle.

18. (Withdrawn) A foldable water tank as in claim 14, wherein said support structures are disposed outside said receptacle.

19. (Currently amended) A foldable water tank, comprising:  
a) a foldable receptacle having a bottom wall and vertical sidewalls, said sidewalls being inclined inwardly; and  
b) means for supporting said sidewalls in the inclined position when said receptacle is empty.

20. (Currently amended) A foldable water tank, comprising:  
a) a receptacle having a bottom wall and vertical sidewalls, said sidewalls being inclined inwardly; and  
b) said receptacle having a folded and rolled configuration when not in use; and  
c) a plurality of collapsible support structures to support said sidewalls when said receptacle is empty ~~said receptacle is folded by folding said sidewalls over said bottom wall, folding the resulting configuration into one another, and rolling the resulting configuration.~~
